

Obstetricians and Gynecologists

What You Need to Know

CCPN is Here to Help!

Do you need support as North Carolina Medicaid transitions to managed care and value-based payments become part of the your practice's revenue stream?

CCPN has the expertise and the tools to help your practice thrive in the new healthcare environment.

Who is CCPN?

Community Care Physician Network (CCPN) is a clinically integrated network committed to improving the quality of care and support for North Carolina's independent clinicians as the state's health care delivery system transitions to value-based care.

With more than 2,700 primary care, behavioral health, and OB/GYN physicians in over 850 practices, CCPN is NC's largest independent clinician network.

CCPN's Board of Managers and Co-Presidents are physicians who work in independent practices from the mountains to the coast. They understand the values and needs of independent clinicians across North Carolina.

What Does CCPN Do for My Practice?

CCPN is led by practicing independent clinicians from across North Carolina who understand the value of obstetricians and gynecologists.

CCPN is committed to providing obstetricians and gynecologists with:

- Support and services needed to remain independent
- Access to data demonstrating the quality and value of primary care services
- Tools to develop clinical improvement initiatives and establish quality metrics
- The opportunity to contract with private and public payers seeking a high-performing network
- Ways to promote collaboration between primary care and behavioral health clinicians
- New opportunities to participate in quality improvement and value-based payment pilot initiatives with payers

How CCPN Works

Governance

CCPN is governed by a board composed of participating clinicians, ensuring that CCPN operates in the best interests of practices and patients.

Value

Through CCPN, independent practices can collect quality and cost data that demonstrates value to both public and private payers. Practices are able to consider participation in contracts with payers, employers, and other health care entities.

Quality Improvement

Participating clinicians serve on CCPN's Quality Improvement Committee, which develops clinical improvement initiatives and establishes quality goals.

Non-Exclusive Model

CCPN is an open, non-exclusive network. It seeks to collaborate rather than to compete, offering prospective provider-led entities (PLEs), managed care organizations (MCOs), and other payers all-insurers access to an extended, high-functioning primary care infrastructure that includes OB/GYN, behavioral health, and value-added specialty services. An insurer seeking to ensure patient access across a rural area, for example, may do so quickly and cost-effectively through a contract with CCPN. CCPN will look for opportunities to collaborate with other programs demonstrating aligned quality and cost-effectiveness goals.

Joining Fee

For practices with fewer than 15 clinicians, there is a one-time enrollment fee of \$75 per clinician. For practices or IPAs with more than 15 clinicians, the one-time enrollment fee is \$50 per clinician.

Ready to work together with the **largest clinically integrated network of independent clinicians in North Carolina** to deliver high quality care and find success in value-based reimbursement? Contact CCPN to see how we can make this happen together.

About Community Care Physician Network

CCPN is a physician-led, clinically-integrated network that helps independent primary care physicians deliver high-quality, cost-effective care. CCPN's experience and infrastructure turn data into actionable insights and drive quality improvement, measurement, and reporting. Through CCPN, physicians work with peers to improve patient care and coordinate care across conditions, providers, settings and time. CCPN helps you better manage your complex patients while hitting quality targets under value-based reimbursement arrangements.
