NC DHHS COVID-19 Vaccination Fire Side Chat

January 21, 2021

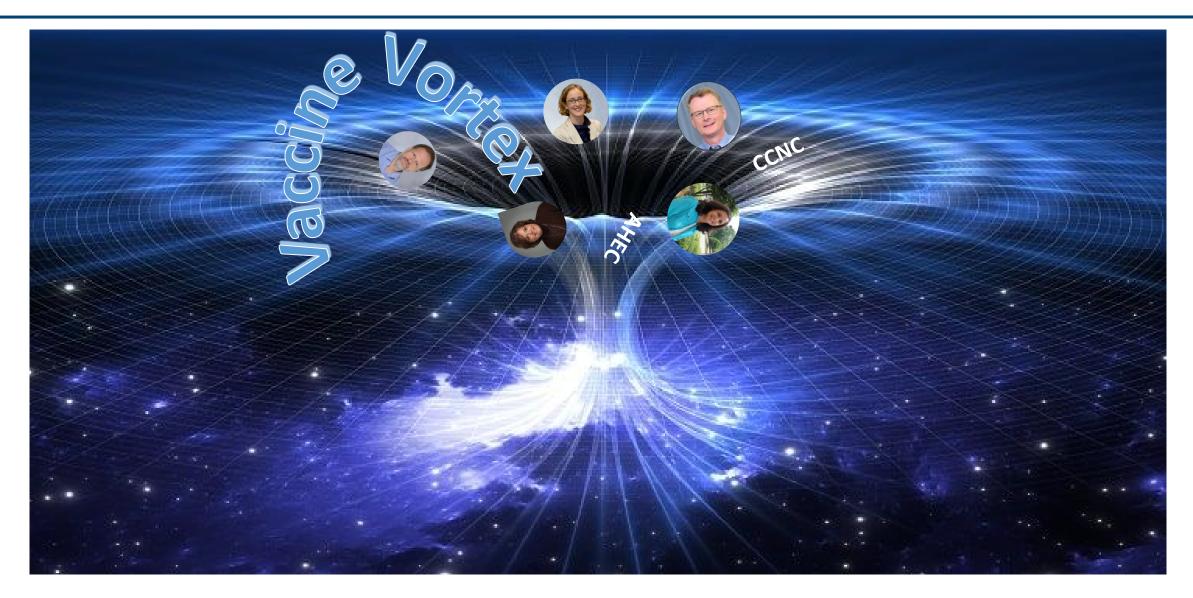

NC DHHS COVID-19 Response

Agenda

- Current State of Vaccines in NC
- Best Practices from the Field
- History of Hesitancy
- Vaccine Truths for Doubters
- Question and Answer

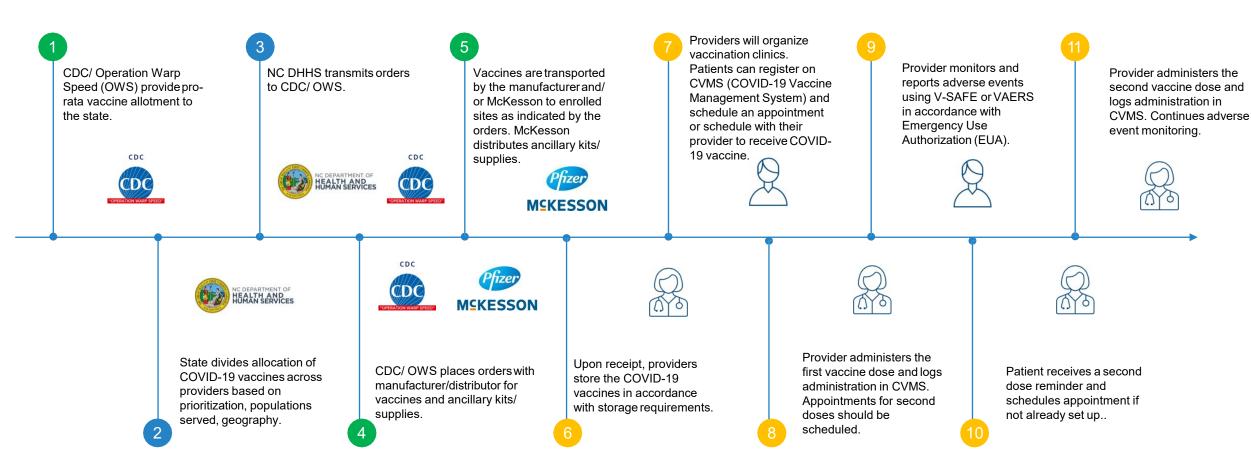

They thought they were coming to be a DHB consultant...but they got pulled into the...

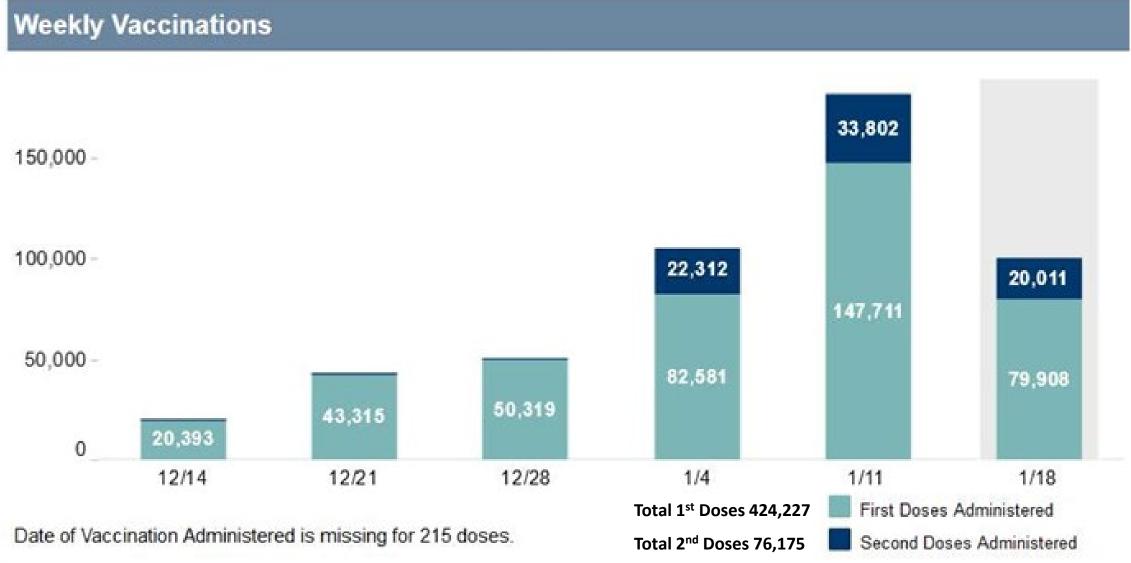

HIGH LEVEL OVERVIEW OF THE VACCINE JOURNEY

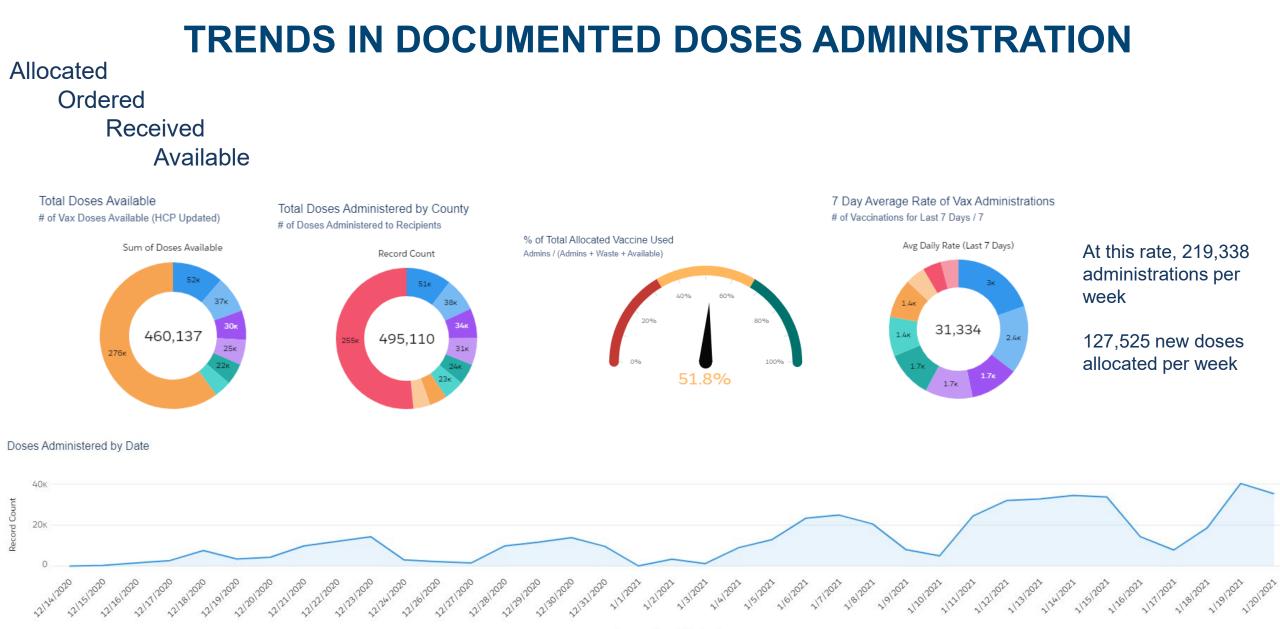

Federal Responsibility
 State Responsibility
 Provider Level

VACCINE IN NC: DOSES ADMINISTERED

Date and Time of Vaccination

As of 1/20/20 at 5:35 pm

The vaccination program currently is focused on executing and improving three core areas:

Speed of Vaccinations

Address Consumer Confusion

Speed

Initial speed helps us with longer term equity

Focus on using **all** the vaccine on shelves and **documenting** those doses in CVMS

Vaccine providers:

- Broader, simplified prioritization groups should remove barriers to identifying eligible individuals
- Use all allocated vaccine within 7 days
- Do not waste any vaccine
- Share vaccine with other providers as needed
- OK to vaccinate individuals across county lines
- Outreach to providers with reserve to understand barriers, plans for acceleration, facilitate sharing

Coordinated "big pushes" to utilize back supply

- Focused on health care workers and older adults.
- 39 sites, Expected 100k+ doses

Finalizing details with multiple vendors to deploy mass vaccination sites

Mega sites in the plans (e.g., Panthers stadium)

Staffing Support

- Shifting staff within reach
- Channeling additional staffing resources: Emergency
 Management and National Guard
- Coordinating Staff: State-Staff and Public Volunteers
- Data entry support

Vaccine Allocation Methodology

 Shifting allocations from sites that have reserve to sites that have high throughput and matching allocations to expected throughput of next week

Onboarding additional vaccine providers:

- FQHCs starting to administer vaccine this week
- Sharing vaccines across enrolled providers
- Opened enrollment to a much broader group of vaccine providers (e.g., PCPs, occupational health) with prioritized onboarding and vaccine allocation

VACCINE: EQUITY + HESITANCY & CONSUMER CONFUSION

EQUITY + HESITANCY

Local partnerships

 LHD HMP enablement planning with vaccine focus in order to better link state and local infrastructure in its support of HMP and vaccination roll-out

Highlighting the voices of trusted messengers

- 3 vaccination news events held with 65+ HMP leaders; recording >15 leaders for PSAs
- Training 100+ vaccine 101 presenters from AMEXCAN and HMP advisory group

Education and Guidance

- Holding webinars with LTCF medical directors and staff to provide info on vaccination best practices and guidance
- Upcoming Medicaid fireside chat with providers on vaccine hesitancy

CONSUMER CONFUSION

Tools to help people find their spot

- Launched <u>FindYourSpot</u> with contact info for LHDs + hospitals that have vaccine available
- Launched COVID-19 line through CCNC (1-877-490-6642) to help with call volume
- Public facing 'first line' call center tracking for Jan. 30 launch date
- Exploring online screening wizard for individuals based on eligibility criteria

Communications toolkit for 65+

 New <u>flyers</u> to reach 65yo+, pushed out broadly (Message: Supplies limited, may have to wait)

Preparing for frontline essential workers

 Working to define "who" and "how" frontline essential workers will get vaccinated

Your best shot at stopping COVID-19.

YOU HAVE A TAKE YOUR SPOT. SHOT.

For more information: YourSpotYourShot.nc.gov

LTC ADMINISTRATION PROGRAM

The federal LTC program has administered 68,802 (41.5%) doses of vaccine of the 165,900 doses allocated to the LTC program.

- Calling LTCF medical directors and staff directly to provide context on resources and to get a sense of the barriers they are facing
- Conducting outreach to engage LTCFs to further encourage staff to sign up for second and third clinic dates, including virtual events, live Q&As, and townhalls with key influencers and panels

Pharmacy	Total Facilities	Number of Facilities Completed	Total Beds Scheduled	Resident 1st Doses	Staff 1st Doses	Total Doses

Allocation Source	NC's Allocation	Federal Allocation

CONSUMER CONFUSION: CLEAR GUIDANCE FOR PROVIDERS

- Vaccinating Providers
 - New guidance document released for LHDs and hospitals/health departments
 - Emphasis on need for coordination
- Primary Care Provider Messages
 - Primary care providers are critical partners and play a key role to helping older North Carolinians get vaccinated.
 - Helping coordinate finding vaccination sites in your community and linking patients to them over the next several weeks is greatly appreciated.

PREPARING FOR THE NEW COVID-19 VACCINE MANAGEMENT SYSTEM (CVMS)

What is CVMS?

CVMS is a secure, cloud-based vaccine management solution for COVID-19 that enables vaccine management and data sharing across providers, hospitals, agencies, and local, state, and federal governments on one common platform. Providers will be able to do the following:

- Enroll in the COVID-19 Vaccine
 Program
- Manage COVID-19 vaccine inventory
- Manage scheduling clinics
- Track COVID-19 vaccine
 administration
- Produce and analyze reports on COVID-19 vaccinations

Who will use CVMS?

NC State officials will enroll providers and verify provider eligibility along with verifying site readiness.

Patients will enroll and have their eligibility verified by their providers. They will also use CVMS to register and schedule an appointment to receive COVID-19 vaccine.

Providers will verify patient eligibility, log dosage administration, and track frequency and timing of additional dosages.

Why CVMS?

CVMS provides a flexible approach for managing, delivering, and administering vaccine programs. It consolidates multiple legacy, siloed systems into an integrated platform with configurable modules. This will allow for quicker updates to the system in order to meet business needs. In addition, built-in automation features means less time on routine tasks and more time on high-value activities.

CVMS ACCESS

NCDHHS's CVMS consists of four user portals: Provider Enrollment, Healthcare Provider, Employer (not shown) and Recipient. In order to access CVMS portals, DHHS will need to provision access to you and your users. Any attempt to access the portals before account set-up will result in single sign on and login errors.

CVMS Provider Enrollment Portal

Providers must first enroll and be approved by NC DHHS as eligible to receive and administer vaccines at the specified provider location(s).

https://covid-enroll.ncdhhs.gov

Salesforce Provider Enrollment Portal username and password

CVMS Healthcare Provider Portal

After receiving Provider Enrollment approval, providers will onboard to the CVMS HCP Portal to manage vaccine shipping, inventory, and administration.

https://covid-vaccine-provider-portal.ncdhhs.gov

NCID username and password

CVMS Recipient Portal

COVID-19 vaccine recipients are invited by their HCP employers to register their account and complete a health questionnaire.

https://covid-vaccine-portal.ncdhhs.gov

Salesforce Recipient Portal username and password

Support for providers and recipients on NC DHHS COVID-19 vaccine program.

https://ncgov.servicenowservices.com/csm_vaccine

ServiceNow username and password

END-TO-END PROVIDER ONBOARDING PROCESS: PROVIDER ENROLLMENT AND CVMS ACTIVATION

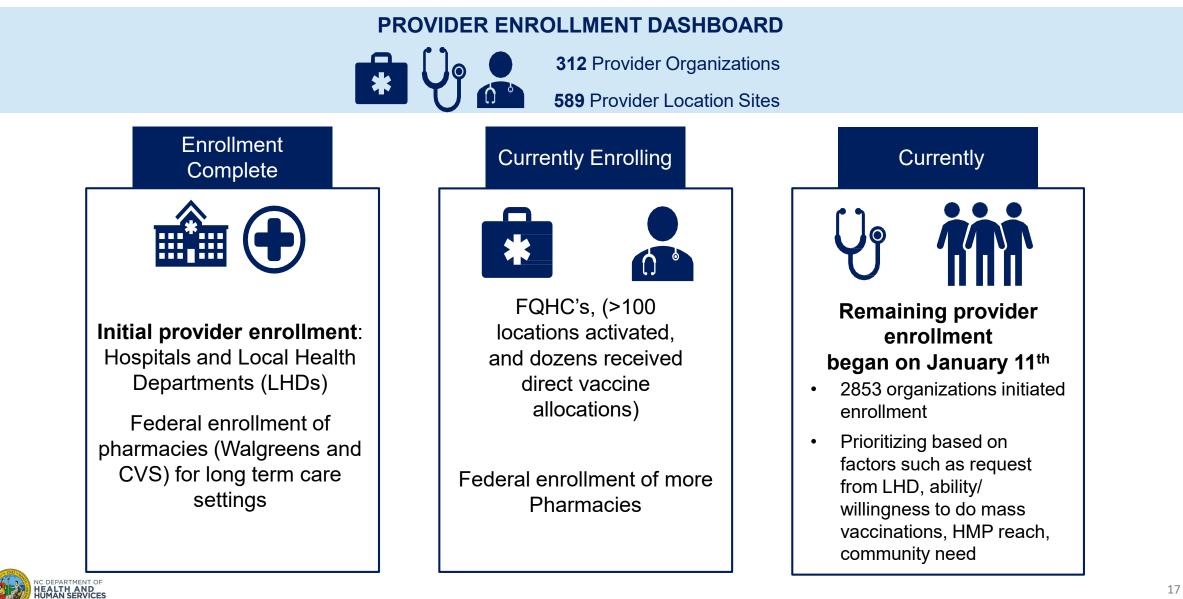

Day 0 Provider contacted for enrollment

	Provider Enrollment			Provider Onboarding and Activation in CVMS						
Provider Onboarding Steps	1. Provider receives training (live or recording)	2. Provider completes applicatio n in CVMS	 3. DHHS provider enrollment approval process: Review CMO and provider licensure matches a) Review storage & handling unit b) Update NCIR and Vtrcks with required information c) CVMS sends auto-generated provider approval email to provider 	4. DHHS sends provider onboarding package (readiness checklist and CVMS training)	5. Provider completes user onboarding templates (provider and recipient upload)	6. Provider submit onboarding templates thru ServiceNow tickets	7. DHHS assigns NCID for individual user profile (NCID team)	8. DHHS creates user profile in CVMS (Accenture team)	9. CVMS sends auto- email with login info	Total Potential Duration

Risk: Provider may not complete the registration correctly – increasing activation processing time after approval

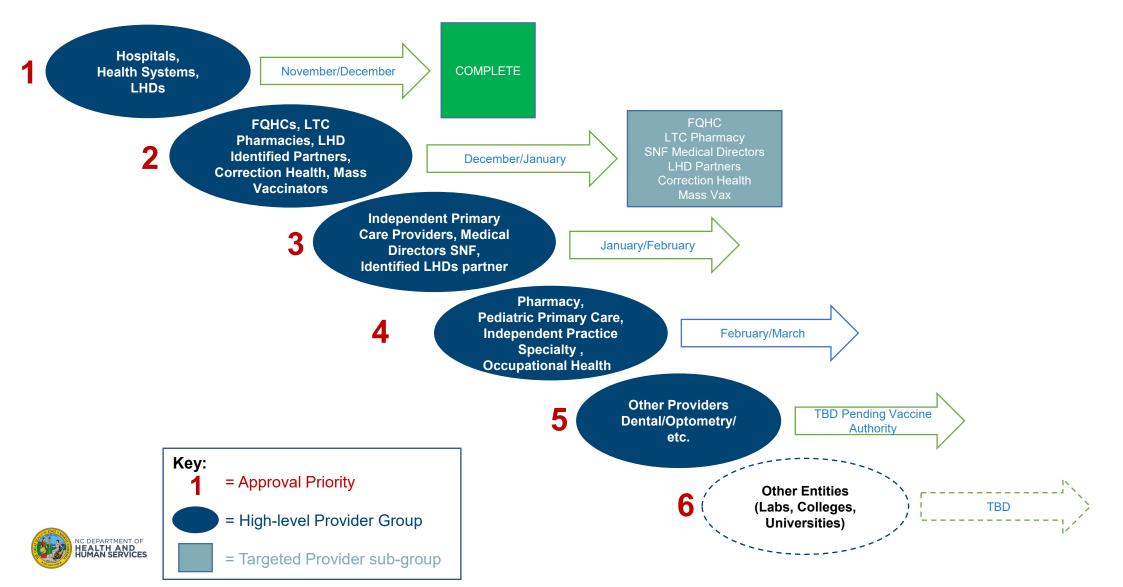

VACCINE: PROVIDER ENROLLMENT

PROVIDER ENROLLMENT, ONBOARDING, APPROVAL PRIORITIZATION

Proposed Vaccine Activation Priority Methodology

GROUP 3 PRIORITIZATION

PRIORITIZATION OF GROUP 3: 3 1st Family Medicine & Internal Medicine 2nd Peds identified by LHDs 3rd Occupational Health

ESCALATION FACTORS:

Request from LHD

- Size of practice/reach/willingness to do mass vaccinations clinics that includes patients not part of their practice
- Community Need
- HMP Reach
- Confidence
 - Specialty Society input
 - VFC Experience/performance
 - Organization of application

Rationale: FM/IM take care of large volume of 1B populations, particularly Medicare-aged and experienced in routine vaccinators.

Rationale:

If LHD have high confidence and existing partnerships and needs, escalating those practices to front of line indicated. Additional Priority Factors:

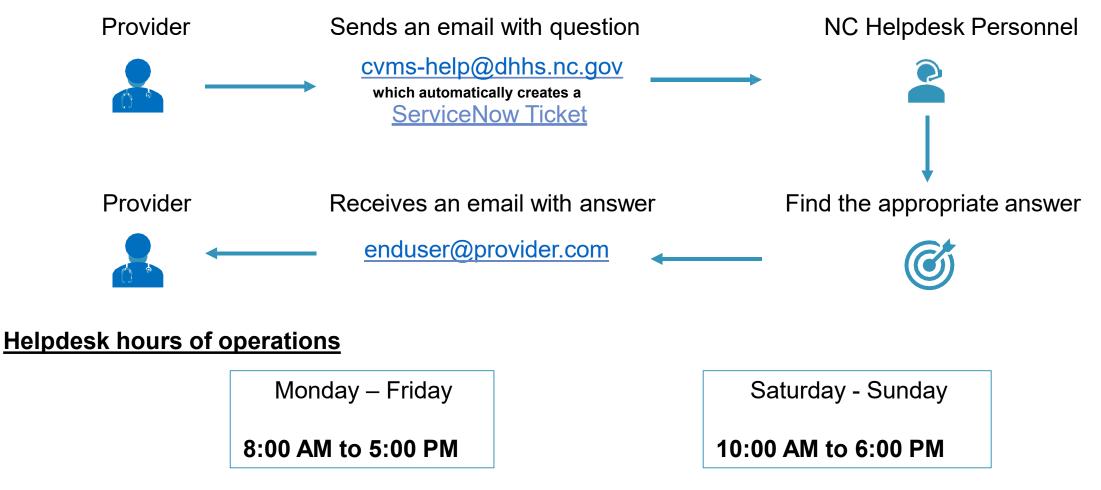

- If practices are large and have multiple locations
- If practices are located in identified CRITICAL NEED areas
- If practices have unique access to vulnerable HMPs
- If practices are identified as HIGH CONFIDENCE practices

COVID-19 VACCINE HELPDESK IS <u>LIVE TODAY</u> TO HELP YOU!!!

Helpdesk process

C DEPARTMENT OF EALTH AND UMAN SERVICES

Need Help! Call into the Virtual Office Hours: 984-204-1487 Code: 871816988. Office Hours are M-F from 8am-5pm

Staffing Support

- Notifying LHDs of short- and longer-term resources
- Channeling LHD staffing support requests via local EM through WebEOC
- PHP&R triaging requests to identify best match to support needs
- Immediate Shifting staff within reach
 - •Case Investigation / Contact Tracing Staff

•Regional DHHS Staff

Utilizing Volunteers

- 270 Division of Public Health volunteer surveys received
 - 40 Clinical
 - 230 General support (including data entry)
 - Requesting DPH staff to train on CVMS to help LHDs w/data entry
- Currently determining specific availability to support requests
- Board of Pharmacy survey of certified pharmacists vaccinators ~600 responses w/nearly 400 vaccinators.
- Coordinating with AHEC and IHE schools of health sciences
- Matching with State-Staff and Public Volunteers

VACCINE ADMINISTRATION

Front Desk Staff Searches for Recipient in CVMS (Scheduled or Walk-in Appointment)

Search for the Recipient in CVME by entering their name, DOB or email address. You will only need to choose one field is order to return results.

If a Recipient is registered in CVMS you will be able to locate their record and view their information: · Priority Status

- · Recipient's Eightiny Status
- Vaccine Dose Status.
- Booked Appointments

If errors were flagged on the replacend recipient's health quantionnaire or it is incomplete, the recipient can make on the spot updates from their phone. The CVMS RECPENT PORTAL is mobile friendly

1a

by sufficient their priority and eligibility status as listed in CVME

The State of North Carsilna does not require proof of identity to proceed with vaccine

HCP Administers COVID-19 Vaccine

HCP administers vaccine and captures key details in C/ME:

- · brjection site
- · Dose (First or second) Boute (Intramuscular (IM) or subcutaneous (SQ))
- Date/time of dose
- + Vacuine product (Pfaer or Moderna) · Patient notes
- · On behalf of Clinician statement (if applicable)

HCP reviews information for correctness before submitting

CVMS Automatic Notifications 61

- Recipients will receive TWO second dosage reminder notifications:
- First Reminder 24 HOURS ofter
- Second Reminder ONE WEEK after first dosage

Recipients will also receive a proof of vascination notification instructing them to access their vaccination details via the CVMS RECIPIENT PORTAL

Emails from @vaccinetefo:

Communications will be shared regarding CVMS enhancement updates, planned outages, training event insitations and information about new user guides and video demonstrations.

Point of Care Process for Unregistered Recipients A horst desk staff member will need to guide an unregistered recipient through the Point of Care process before they can receive the vaccine. On the Provider portal page, Go to the Help & Information tab and download the COVID-19 Vaccination.pdf · Print out the full question raise for the recipient to physically complete · Once completed, create a new recipient record and carefully enter the results from the print out. Complete this process with the recipient present. If something is entered incorrectly, you will need to submit a ServiceNew ticket for any record Validate your inputs before submitting to enrol.

CP locates Recipient record in CVMS consent to administer COVID-19 Vaccine verb by entering their name, DCB or email addres: one field in order to return results. to segient who will give verbal consent HCP reads vasizing health disclar or Moderna COVEN19 vaccine that they authorize to receive HCP records they have recriced the Recipient's verbal consect in CrMS

HCP Reviews Post-Vaccine Reminders with Recipient

V-Safe Sheets

EUA Fect

Sheets

At the end of the appointment, the HCP will

- · Print out and provide Proof of Vaccination card from
- CAR Review V-Safe information
- · Share timing requirements for second dosage
- Schedule 2nd dose appointment

Recipients can view their seccination status and re-print their vaccine card in the RECIPIENT PORTAL by going to My dailyboard > Vaccine Record

COVID HELP DESK- NOW THRU JANUARY 30, 2021

Expanding ability for all North Carolinians to call and receive prompt and reliable information regarding the vaccine.

CCNC COVID Call Center (877) 490-6642

Now, until 1/29...

CCNC COVID Call Center provides increased caller capacity to **alleviate pressure on LHDs** as a 'first line' to call for general questions

Call center personnel include **both clinical and non-clinical professionals** who can support a variety of recipient questions about the COVID vaccines CCNC COVID Call Center will contact LHD daily with consumer inquiries about vaccine availability to have the most up to date information at all levels

COVID HELP DESK- FUTURE JANUARY 30, 2021-THRU TBD

Expanding ability for all North Carolinians to call and receive prompt and reliable information regarding the vaccine.

Provides multi channel approach to serve as Resident facing call center for general vaccine administration (English and Spanish inbound calls, TTY, call back assistance, after hours voice messaging, web-based inquiries.)

NC COVID Vaccine Help Center (888) 675-4567

> Provides clinical and non-clinical professionals who can support a variety of residents questions about the COVID vaccines.

Coming Soon!

Provides navigation on eligibility registration, vaccine site locations, and designing future integration of enhanced technology (chat bot, virtual agents)

Dr. Chris DeRienzo

RECOMMENDED BEST PRACTICES FOR COVID-19 VACCINE ADMINISTRATION IN YOUR PRACTICE

- Create and distribute **patient education materials.**
- Develop a **patient education video** for your patients and post to your website and social media.
- Run a **list of patients from your EHR** to prioritize your outreach and administration. Filter and prioritize the patients based on the vaccine eligibility criteria.
- Develop scripts for your staff so that your communication is consistent.
- Include **important information in communications** including vaccine availability, practice's system of administering vaccine, benefits, side effects, and that the vaccine is free to the patient.
- Ensure **communication is concise and easy to understand** for all your patients.
- Update your **telephone triage system**, **VOICE mail**, **email**, **website and social media** with updated information for routine patient education and updates.
- Utilize your **patient portal and regular mail** to communicate vaccine and appointment updates.

RECOMMENDED BEST PRACTICES FOR COVID-19 VACCINE ADMINISTRATION IN YOUR PRACTICE

- Contact **local health department and hospital to explore options** for patient vaccinations and possible collaborative immunization clinics.
- Offer **special immunization clinics during week or weekend** (similar to flu shot clinics offered in the past).
- Provide sheltered drive-thru or parking lot immunization clinics for patients who meet criteria.
- Designate certain locations for vaccine administration if practice has multiple sites and limited resources.
- Know the **billing and coding for vaccine administration**: vaccines are free to all patients, vaccine administrative costs are reimbursed for each dose.
- Document in both CVMS and your practice EHR to ensure patient's vaccine history is fully up to date.
- Work with **AHEC and CCNC practice support coaches** to help you with any clinical workflow redesign needs.

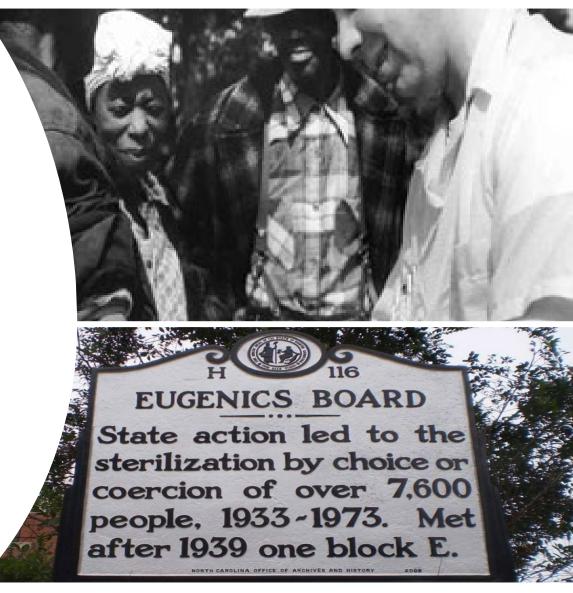

History of Hesitancy

HISTORY OF BIAS & DISPARITY IN HEALTHCARE

Historical Medical Trauma Triggers

- Not just Tuskegee
 - Infamous Tuskegee syphilis study in 1932 was commissioned by the US government – Public Health Services
- Eugenics Project in North Carolina from 1933-1973
 - State action led to sterilization by choice or coercion of over 7,600 people
- Dr. Eugene L. Saenger University of Cincinnati radiation study from 1960-1971
 - Experiments in radiation irradiated 88 men, women and children, most of them poor, uneducated black people. It was reported that large amounts of radiation exposure caused some to die in just a few hours.

HISTORY OF BIAS & DISPARITY IN HEALTHCARE

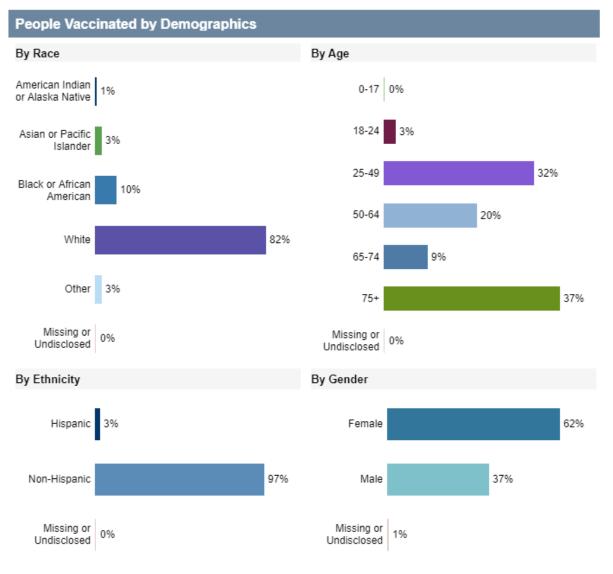

Historical Medical Trauma Triggers

- Dr. James Marion Sims, Father of Gynecology
 - Honed his craft and science practicing on slave women in 1800s
- Henrietta Lacks
 - Sought treatment at Johns Hopkins in 1951; diagnosed with cervical cancer

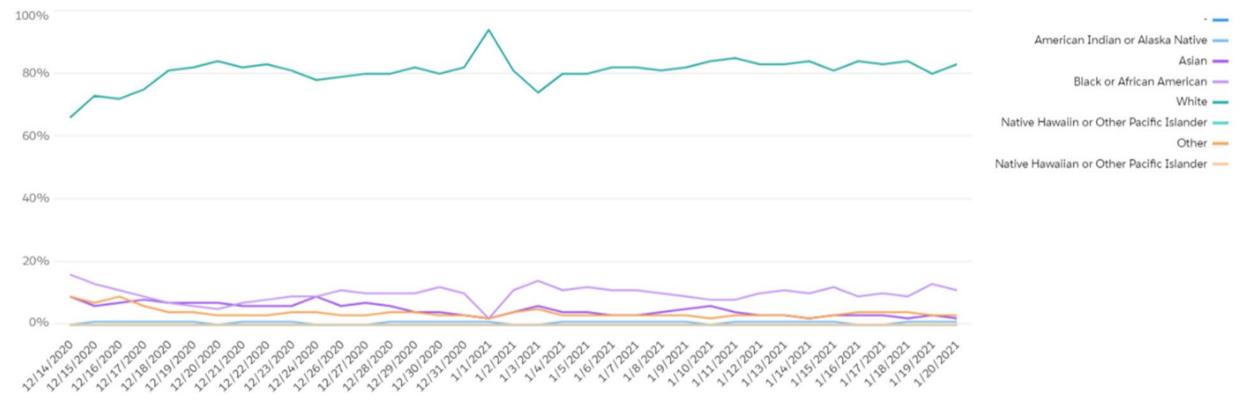

NORTH CAROLINA VACCINATIONS - CVMS

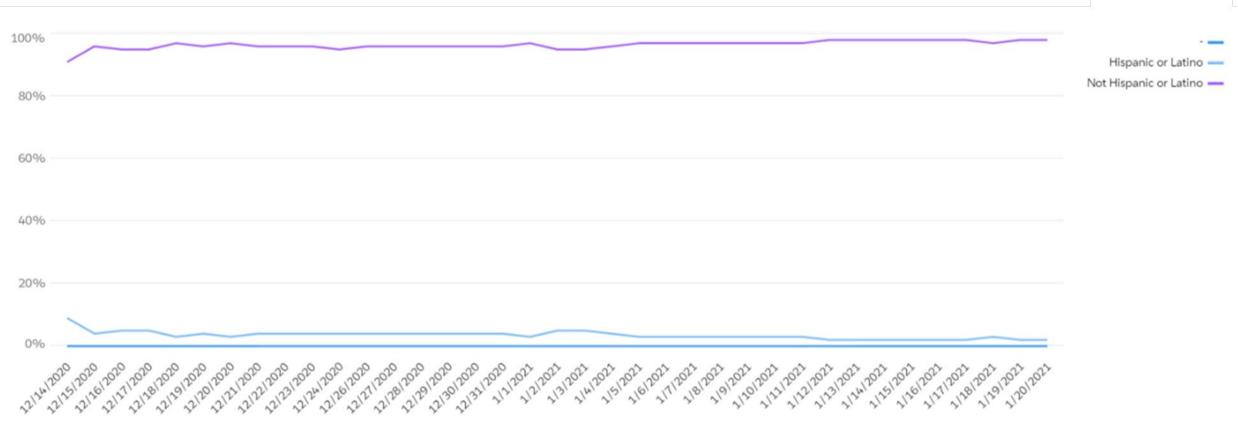

PERCENT OF ADMINISTRATIONS BY RACE OVER TIME

Date and Time of Vaccination

PERCENT OF ADMINISTRATIONS BY ETHNICITY OVER TIME

Date and Time of Vaccination

Equity & Hesitancy

COMMUNICATIONS CAMPAIGN BUILT ON RESEARCH WITH HMP

- >1900 surveyed & 30 interviewed, majority from HMP. Messengers are 90% of message effectiveness.
- Partnership with NCCU ACCORD for testing and vaccination outreach

OPERATIONAL APPROACHES

- Prioritize vaccine providers who can reach historically marginalized populations (e.g., community health centers)
- Vaccine and resource allocation (e.g., surge staff deployment) across the state
- Early activation point-of-care CVMS registration to vaccinate individuals without emails
- Mass vaccinations sites in areas trusted by HMPs (e.g., HBCUs, Faith Based organizations, high schools with high free and reduced lunch populations Mass vaccinations sites selection
- Utilize Community Health Workers to help navigate process
- Transportation resources, hold appointments for HMPs

BRINGING IN THE VOICES OF TRUSTED MESSENGERS

Started with health care workers & trusted public influencers. Inviting others to share their own videos to promote vaccination.

REGULAR ENGAGEMENT WITH HMP LEADERS

- HMP Advisory Group (meets weekly)
- Over 80 vaccine presentations to stakeholder groups, from hosting small community health workers "charlas" to webinars with 100-3000+ participants
- Bi-weekly calls with eastern NC black ministers
- Weekly updates with Latin19 group

- Equipping trusted messengers with accurate and up-todate information about NC's COVID-19 vaccine
- After training >70 expert vaccine presenters in NCDHHS, we are offering the trainings to external stakeholders who will receive regular updates on vaccination
- Several organizations are already scheduled for trainings

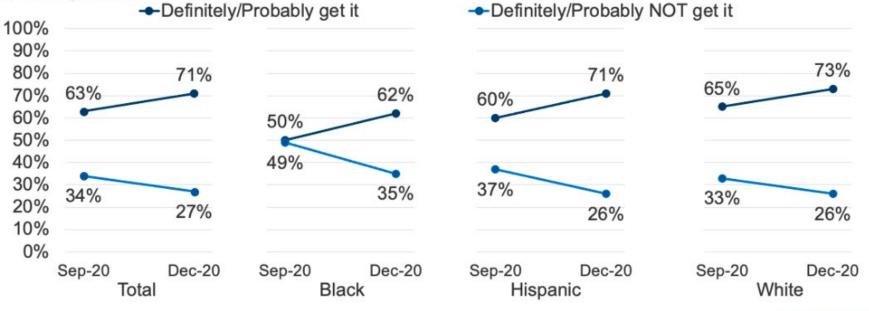

VACCINE HESITANCY DECREASING: KFF SURVEY

Figure 2

NC DEPARTMENT OF HEALTH AND HUMAN SERVICES

Willingness To Get COVID-19 Vaccine Has Increased Across Racial/Ethnic Groups

If a COVID-19 vaccine was determined to be safe by scientists and available for free to everyone who wanted it, would you...?

SOURCE: KFF COVID-19 Vaccine Monitor (KFF Health Tracking Poll, Nov. 30-Dec. 8, 2020); KFF/The Undefeated Survey on Race and Health (conducted Aug. 20-Sept. 14, 2020). See topline for full question wording.

KFF COVID-19 Vaccine Monitor

Figure 2: Willingness To Get COVID-19 Vaccine Has Increased Across Racial/Ethnic Groups

Vaccine Truths for Doubters

There are **currently two** COVID-19 vaccines that have been authorized.

- EVERYONE—no matter race,
 ethnicity, age or gender—who
 gets the vaccine gets the same
 vaccine.
- Both vaccines require two doses
 - to be fully effective, about 2-3

weeks apart.

While the vaccine was developed quickly, scientists had a 50+ year head start in making the COVID vaccines.

- The vaccines were built on years of work to develop vaccines for similar viruses.
- The vaccines use a method that researchers have been studying and working with for decades.

These vaccines have been **tested rigorously**, are safe, and **proven to be effective**.

- More than 70,000 people volunteered in trails for the Moderna and Pfizer vaccines to make sure they were safe; all trials show no serious safety concerns.
- The vaccines show a 95% efficacy in

preventing COVID-19.

You cannot get COVID-19 from the vaccine.

- Pfizer and Moderna vaccines use mRNA (which stands for messenger ribonucleic acid) to give your body instructions to make a protein that safely teaches your body how to make an antibody to fight the real COVID-19.
- Other ingredients are salt, sugar, and fat.
- They do not contain eggs, preservatives, fetal tissue, stem cells, mercury, microchips, or any other ingredients.

Vaccines are the best way to end the pandemic and save lives. Vaccines can get us to "herd immunity" without people becoming infected or sick with COVID-19.
The virus won't spread when enough people have been vaccinated.

• There is no cure for COVID-19.

Keep doing the 3Ws – Wear a Mask. Wait 6 feet apart. Wash your hands.

- It will **take time for everyone** who wants a COVID-19 vaccination to get one.
- While the vaccine may prevent you from getting sick, we don't know yet if you can still carry and give the virus to others after you're vaccinated.
- You won't be fully immune to COVID-19 until 1-2 weeks AFTER your SECOND vaccination.

QUESTIONS?

CVMS TRAINING AND SUPPORT RESOURCES

NC DHHS offers a range of tools and methods for CVMS and vaccine training including communications, user guides, live trainings, and helpdesk support.

Communications: Includes CVMS Provider Portal announcements, enhancement updates, training event invitations, and information about new user guides and video demonstrations. Communications will be tailored to individual roles and responsibilities.

Live Training: Live training will include step-by-step demonstrations of key tasks in CVMS, with opportunities to ask questions and do "replays" to take a closer look with the trainers. A key feature of live training is its high engagement and interaction from trainees.

User Guide: Step-by-step guide that combines text instructions and screenshots to walk users through each task in the CVMS Provider Portal. It breaks down tasks into key steps and includes annotated screen shots and helpfultips.

Helpdesk: email help for all CVMS users during published hours for all CVMS related questions.

Ľ	=	

ServiceNow: CVMS Vaccine Support portal will contain a number of Knowledge Articles and FAQ's that will provide information such as self-help, troubleshooting and task resolution.

Initial training of Phase 1 enrolled Providers is currently in progress.

CONSUMER CONFUSION: CLEAR PUBLIC MESSAGING FOR 75+

COVID-19 vaccinations are now available to people 75 and older. Because vaccine supplies are still limited, those 75 and over may have to wait, but they have one of the first spots to take their shot. If you are 75 or over—or assisting someone who is—here is how to take your shot against COVID-19:

- **Supplies are very limited**. Right now, very few vaccine doses are available.
- You will need an appointment to get vaccinated. You may have to wait to schedule your appointment to get your vaccine.
- Your local health department or hospital can help you get your shot. Because supplies are very limited right now, most doctors cannot provide vaccinations in their offices.
- Find your local health department or hospital. Use the table below to find the health departments and hospitals giving vaccinations in your area. You can search by zip code or county to find locations and contact information.
- You can also call the COVID-19 Line 1-877-490-6642. It's a free call. The COVID-19 Line is managed by Community Care of North Carolina

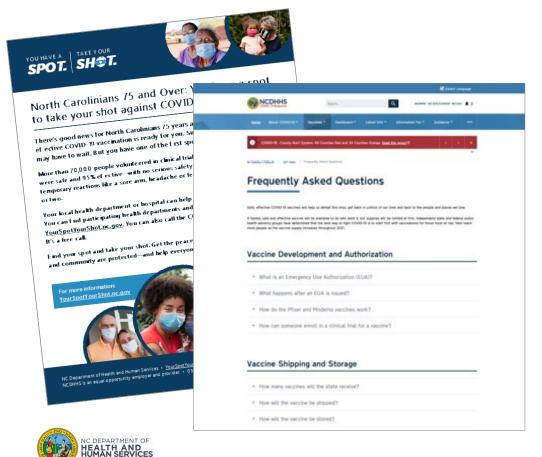

Consumer Confusion

Public Education

- Creating and disseminating materials with accurate and up to date information on vaccines
- YourSpotYourShot.nc.gov

Helping People Find Their Spot – Version 1

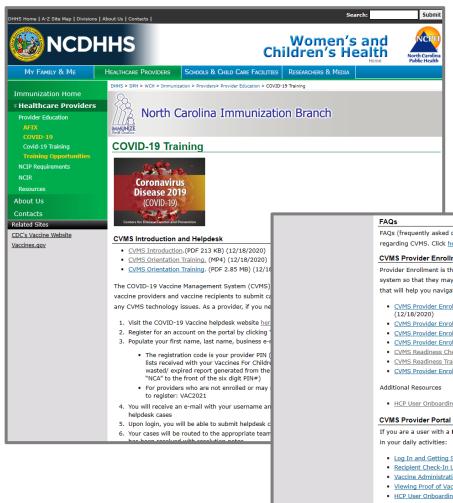

- List of all enrolled vaccine providers who have received vaccine allocations is linked at the top of the NCDHHS vaccine page
- Working with vaccine providers to keep information updated and on staffing and strategies to make sure calls are answered
- COVID-19 line (CCNC)
- Public facing 'first line' call center tracking for Jan. 30 launch date
- Coming Soon: Online eligibility screener, call center with increased capacity, additional way-finding tools for consumers
