

PHREESIA FOR

# Community Care Physician Network (CCPN)

Phreesia helps CCPN practices maximize efficiency, boost time-of-service collections and enhance care through the collection of critical patient-reported outcomes and clinical screenings. Our platform automates time-consuming tasks for your staff and gives your patients an individualized experience at every visit.

Phreesia

## CCPN organizations use Phreesia to successfully:

Digitize intake and reduce paper waste by asking the right questions to the right patients at the right time

Collect information about social determinants of health that influence patients' access to care, quality of life and overall health outcomes

Automate insurance verification with real-time eligibility checks that sync with 900+ payers

Eliminate awkward conversations at the front desk by letting patients make payments from anywhere—at home, on the go or in your office

Close gaps in care and meet quality measures with targeted patient outreach

## Key results from Phreesia clients

**85%** of patients check themselves in

**Save 5+ minutes** of staff time per visit when patients check themselves in

**91%** of payments owed are collected at the time of service

**96%** of patients are satisfied with their Phreesia experience

“Prior to using Phreesia’s social determinants of health screening tool, we had no way of knowing if patients were struggling to pay for food unless they shared that with us voluntarily. Now, we use Phreesia to screen patients for these needs during online mobile check-in, which offers them a greater level of privacy to answer sensitive questions and is a critical reason why the screenings have been so effective.”

— Sarah Holder, RN, Clinical Director,  
Raleigh Pediatric Associates

**Try Phreesia at no cost.** We cover your implementation and training fees—and you’ll enjoy **no subscription charges** for your first four months. Learn more at [Phreesia.com/CCPN](https://Phreesia.com/CCPN).
